Playground Casa na Árvore Smart

ref. 0997.6

ASSEMBLY INSTRUCTIONS

Assembly video on YouTube:
youtu.be/kC0un9Ilv1M

Product size: **3.14 × 3.93 × 2.80 m**
Tree house with a trunk, a leaf roof, 2 telescopes, a climber, a slide and a spiral slide
Holds 5 children of up to 30 kg each
Age: over 4 years
Assembled by an adult.
12 steps · keep this manual for future reference.

BEFORE YOU START

Read carefully

Caution

Give this toy to the child only after it has been **assembled by an adult**, and always use it under **adult supervision**.

Assembly rules

- Assemble in this order: **trunk**, **floor**, **walls** and **tubes** (each tube right after the walls of its corner), bolts, **telescopes**, **roof** and bolts and, last, the **climber**, the **slide** and the **spiral slide**.
- The 100 mm bolts take a **washer on each side** and the **lock nut**.
- Assemble on level ground.

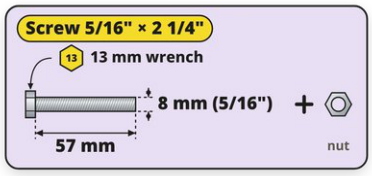

Tools

- **2 × 13 mm wrenches** (or a wrench + a 13 mm socket): 5/16" × 2 1/4" screws with nut (3 sets, step 6) and 5/16" × 100 mm screws with nut (10 sets, steps 6 and 9). One holds the nut while the other turns the screw.

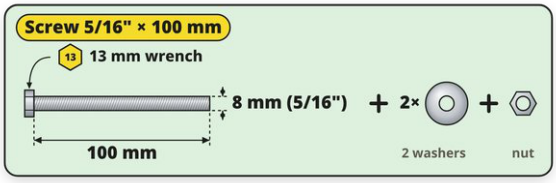

There are no specific tightening torques. The nuts are self-locking: tighten until the washer is snug, without crushing the plastic.

Screws in this playground

Each type has its own color. The same card appears in each step and in the assembly video.

3× Screw 5/16" × 2 1/4" · step 6

10× Screw 5/16" × 100 mm · steps 6 and 9

PRODUCT ASSEMBLY

Step by step

In each step, the arrows show where the part goes, the **black numbers** give the order and the **yellow letters** point to the details explained under the picture.

1 STEP 1 OF 12 Trunk halves

Fit the two halves of the **trunk** together, facing each other, until the edges line up.

CAUTION
Assemble on level ground, with no children nearby.

PARTS FOR THIS STEP

2× Trunk
ref. 993203

How it looks at the end of step 1

2 STEP 2 OF 12 Platform

Fit the **floor** on top of the trunk, with the yellow hatch facing up.

PARTS FOR THIS STEP

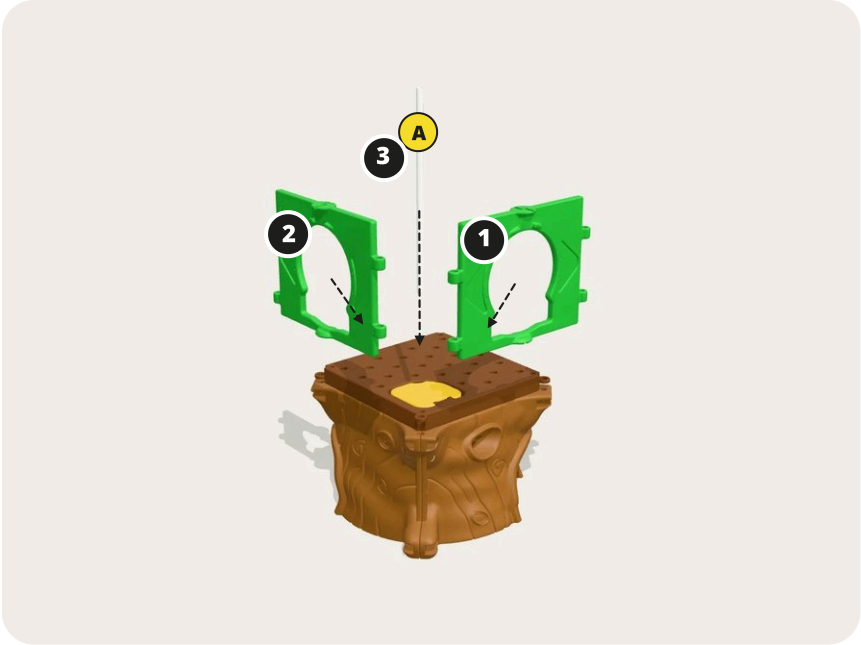

1× Platform
ref. 993204

How it looks at the end of step 2

STEP 3 OF 12

3 First walls and tube

A Tube at the corner of the 2 walls

Fit two **green walls** onto the floor to form a corner: one at the front and one at the side, with the corner tabs one over the other.

Right away, slide a **tube** down through the tabs of both walls at that corner until it goes into the trunk. The tube holds the walls upright.

CAUTION
Put in each tube right after the walls of its corner. Without the tube, the walls do not stand up on their own.

PARTS FOR THIS STEP

2× Green wall
ref. 975402

1× Tube
ref. 993207

How it looks at the end of step 3

4 STEP 4 OF 12
Back wall and tube

Move on around: fit the third **green wall** at the back, with its tabs over those of the side wall.

Slide another **tube** into the corner between these two walls until it goes into the trunk.

PARTS FOR THIS STEP

1× Green wall
ref. 975402

1× Tube
ref. 993207

How it looks at the end of step 4

5 STEP 5 OF 12
Yellow wall and tubes

B Yellow wall

Close the house with the **yellow wall**, fitting its tabs into those of the back wall and the front wall.

Slide in the last 2 **tubes**, one at each corner of the yellow wall, until they go into the trunk.

PARTS FOR THIS STEP

1× Yellow wall
ref. 957602

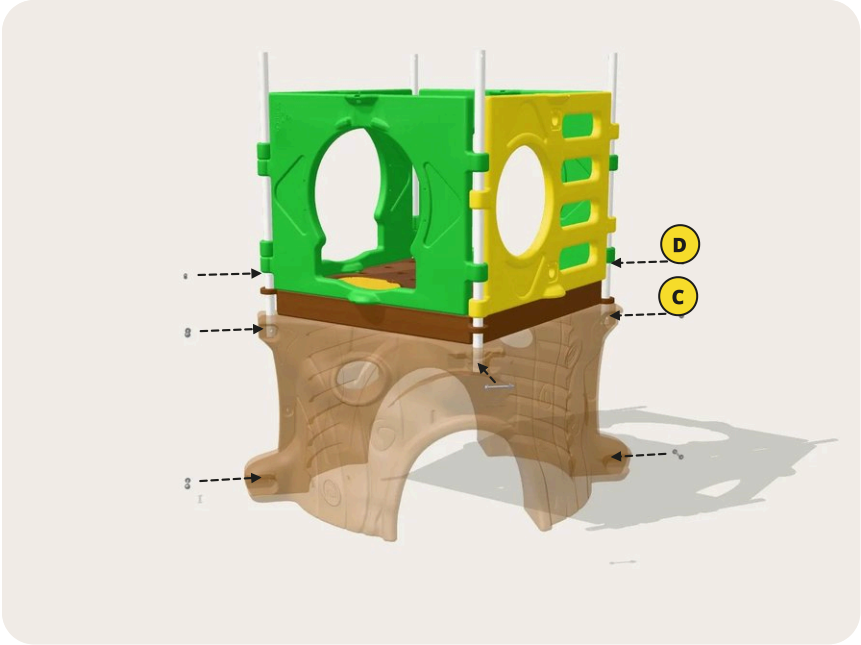

2× Tube
ref. 993207

How it looks at the end of step 5

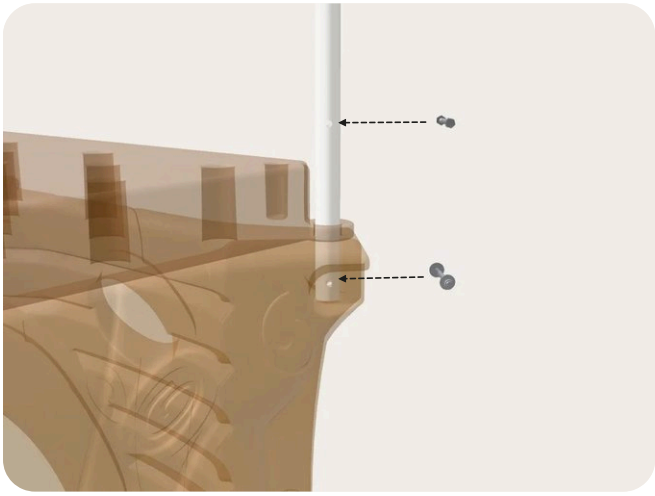

STEP 6 OF 12

6 Trunk bolts

C 5/16" × 100 mm bolt with 2 washers and nut

D 5/16" × 2 1/4" bolt with nut

Bolts at a corner

Fasten the trunk and the tubes with the **5/16" × 100 mm bolts**, with a washer on each side and the lock nut:

2 at the bottom, where the trunk halves meet, and **4** at the top of the trunk, one at each corner, through the tube.

Also fasten the walls to the tubes with the **3 bolts 5/16" × 2 1/4"** and nut, just above the floor.

PARTS FOR THIS STEP

9× Lock nut ref. 2090370

3× 5/16" × 2 1/4" bolt ref. 2090392

6× 5/16" × 100 mm bolt ref. 2090403

12× Washer one on each screw

SCREWS AND TOOLS

Tool: **2 × 13 mm wrenches**: one holds the nut while the other turns the screw.

Tool: **2 × 13 mm wrenches**: one holds the nut while the other turns the screw.

How it looks at the end of step 6

7 STEP 7 OF 12
Telescopes

Fit the 2 **telescopes** on top of the walls, in their holes.

PARTS FOR THIS STEP

2× Telescope
ref. 993206

How it looks at the end of step 7

8 STEP 8 OF 12
Roof

Fit the **roof** on top, with the ends of the 4 tubes going into the roof sockets.

PARTS FOR THIS STEP

1× Roof
ref. 993202

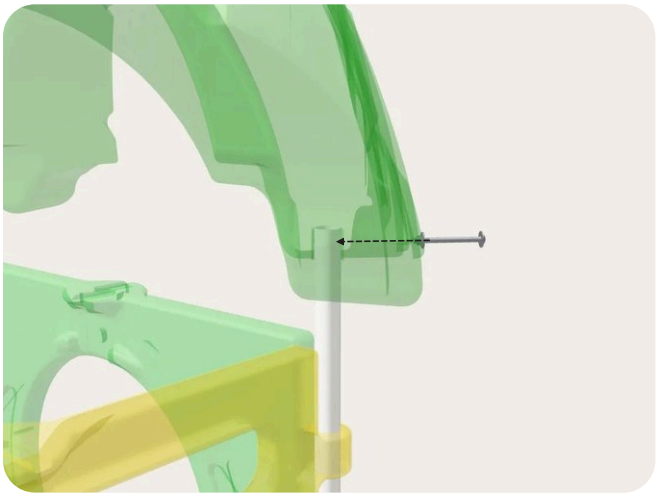

How it looks at the end of step 8

STEP 9 OF 12

9 Roof bolts

C 5/16" × 100 mm bolt with 2 washers and nut

Bolt at the top of the tube

Fasten the roof to the 4 tubes with the **5/16" × 100 mm bolts**, with a washer on each side and the lock nut.

PARTS FOR THIS STEP

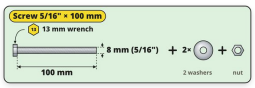

4× Lock nut ref. 2090370

4× 5/16" × 100 mm bolt ref. 2090403

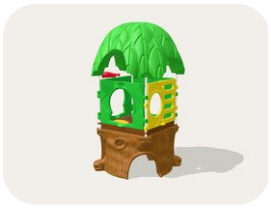

8× Washer one on each screw

SCREW AND TOOL

Tool: 2 × 13 mm wrenches: one holds the nut while the other turns the screw.

How it looks at the end of step 9

10 STEP 10 OF 12
Climber

Fit one side of the **climber** onto the edge of the floor, then the other side, until it is firm.

PARTS FOR THIS STEP

1× Climber
ref. 957605

How it looks at the end of step 10

11 STEP 11 OF 12
Slide

Repeat with the **slide**, at the opening of the green wall opposite the yellow wall.

PARTS FOR THIS STEP

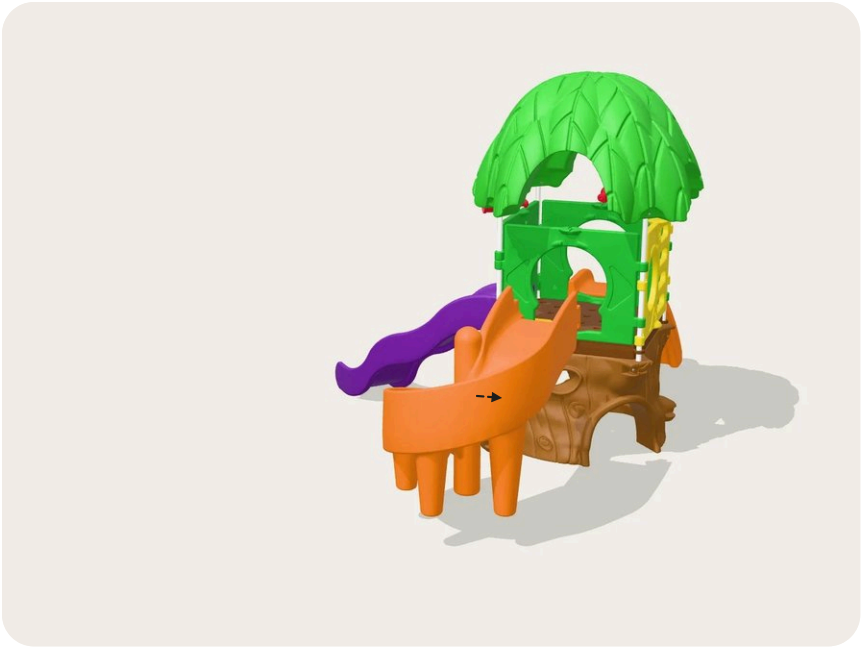

1× Slide
ref. 957606

How it looks at the end of step 11

STEP 12 OF 12

12 Spiral slide

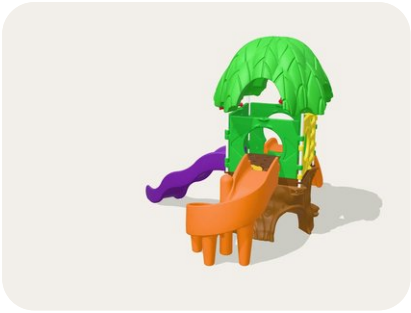

Repeat with the **spiral slide**, at the opening of the front wall.

Check that every bolt is tight.

PARTS FOR THIS STEP

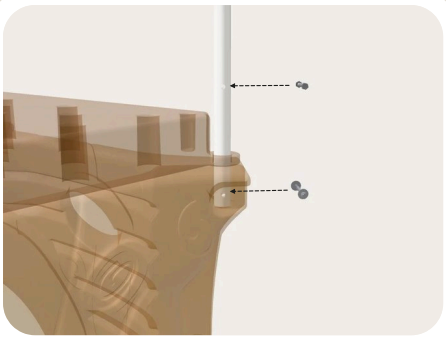

1× Spiral slide
ref. 956509

How it looks at the end of step 12

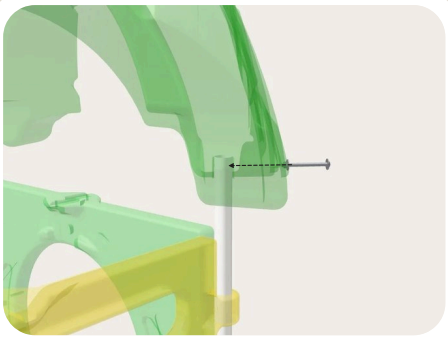

FASTENING DETAILS

How each part is fastened

Trunk, tubes and walls

6 bolts 5/16" × 100 mm in the trunk (2 at the bottom and 4 at the top, through the tubes) and 3 bolts 5/16" × 2 1/4" in the walls.

Roof

4 bolts 5/16" × 100 mm, one at the top of each tube.

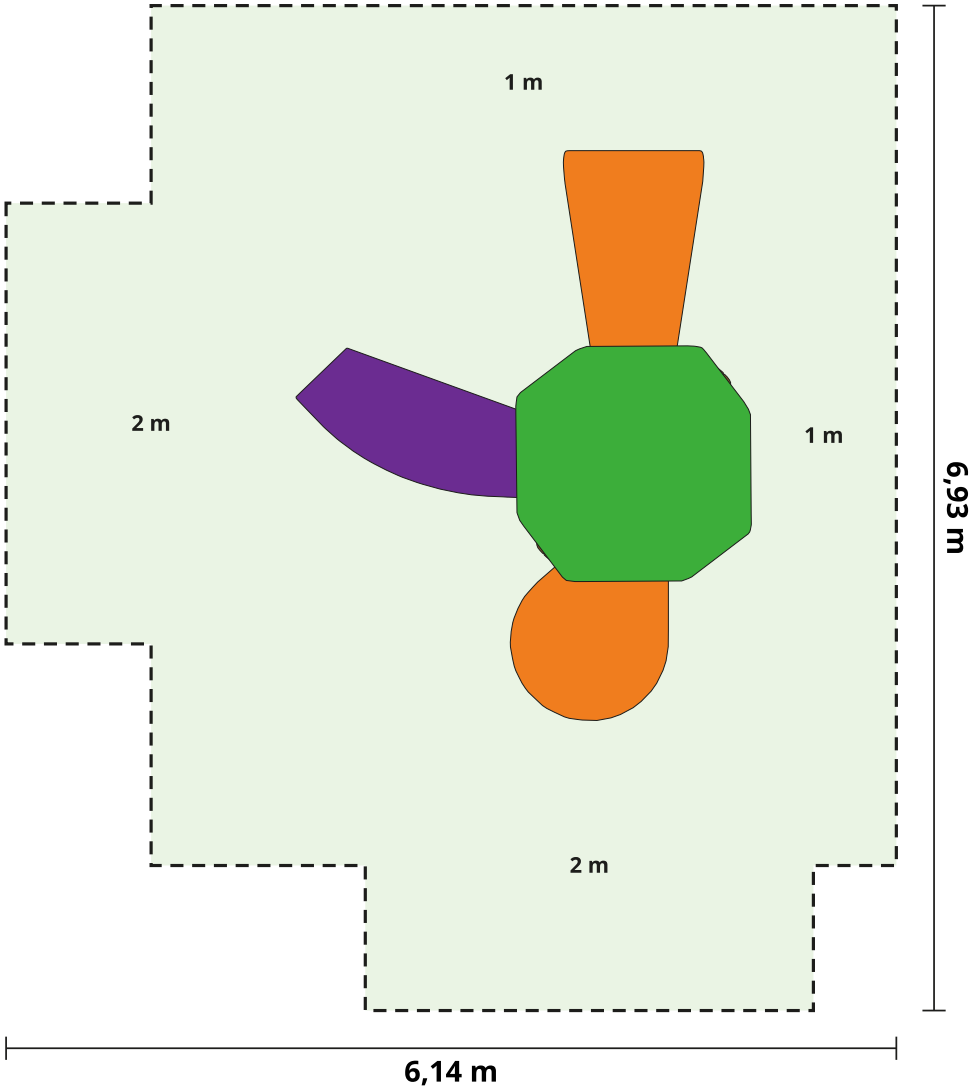

Assembly complete

Check the product visually, making sure every part is fitted and firmly fastened. **Only then let children use it.**

Holds 5 children of up to 30 kg each. Check the 13 bolts and the fit of the climber, the slide and the spiral slide.

INSTALLATION DETAILS

Location and safety area

Area reserved for installation and impact (top view): 1 m around and 2 m at the exit of the slide and of the spiral slide, 6.14 × 6.93 m. Product size: 3.14 × 3.93 × 2.80 m.

To keep users safe, minimum spaces and free distances must be respected.

Circulation area: at least 1.20 m wide around the equipment, so users can run freely; at least 1.50 m where the path changes direction, so strollers and wheelchairs can get in and turn.

Fall space: neighboring static equipment with overlapping fall spaces must be at least 1.50 m apart for a fall height of up to 600 mm, and 2.50 m for higher falls. Maximum fall height of this product: **930 mm**.

Slide landing area: at least 1000 mm from the sides of the run-out section and 2000 mm (type 01 run-out) or 1000 mm (type 02 run-out) from the end of the run-out section.

Ground: an even, continuous, stable surface that is non-slip in any weather, with no obstacles and a cross slope of no more than 2%. Use on grass, sand, carpet or another soft, level surface.

Location: first check for chemicals and loose material (rubble, sharp objects). Choose an airy place with morning sun, sheltered from drafts; do not install it in basements or garages. Never use it near stairs, roads, swimming pools, water or slippery places. If the area is fenced, the gates must open outwards and be at least 1 m wide.

Footprint: the assembled product takes about 3.14 × 3.93 m of ground; keep 1 m free around it and 2 m at the exit of the slide and of the spiral slide, as in the picture.

To avoid accidents, the child should wear shoes. This product is not intended for commercial use.

INSPECTION AND MAINTENANCE

Keep the playground safe

Visual inspection — daily

- Cleanliness
- Free distances between the ground and the equipment
- Ground surface finish and exposed foundations
- Sharp edges and missing components
- Excessive wear and structural integrity

Operational inspection — every 1 to 3 months

Pay special attention to the structural integrity of the product, besides the items of the visual inspection.

Main inspection — yearly

- Structure: bending, deformation and cracks
- Finish: cracks, chips, broken or open joints
- Missing, bent, broken, loose or worn parts
- Edges, pinch points, access points and protective surfaces
- Trunk, wall and roof bolts tight
- Climber, slide and spiral slide firmly fitted to the floor

Maintenance

- Tighten the joining parts and clean (do not use paints, solvents or other chemicals)
- Keep the free spaces and drain holes clean
- Replace fasteners and faulty or worn parts

As per NBR 16071-7:2012. Any change that affects safety only after consulting the manufacturer.
