GAME RULES

120 tiles | **2–4** players | **7+** years

Video tutorial: **youtu.be/_nwLmXdQ2yo**

35 × 35 cm board, 4 wooden racks and 120 tiles
2 to 4 players · ages 7 and up
Reforested wood
10 rules · keep this manual for future reference.

BEFORE YOU START

Read before you play

Caution

Contains small parts that can be swallowed. Not suitable for children under 3.

7+ **Ages 7 and up**

Goal of the game

Build words on the board, crossing the other players' words, and score as many points as you can. The result depends only on each player's skill.

You will also need

- **Paper and pencil** to write down the points of each move
- **A dictionary**, only to check the words

Your turn in 3 steps

1. **Make a word** with the tiles on your rack, connected to the words already on the board.
2. **Add up the points** of the letters and the colored-square bonuses. Write them down.
3. **Draw new tiles** so you have 7 again.

Instead of playing, you can also **swap tiles**, but then you skip your turn. · At the end, **the highest score wins**.

PARTS LIST

What's in the box

Board — 35 × 35 cm — **1×**

Wooden rack — one for each player — **4×**

Letter tiles — see the letter table — **117×**

Blank tiles (wildcards) — stand for any letter — **3×**

All the letters in the game

Each tile shows its value. The number below is how many come in the box.

1 point

A	E	I	O	U	M	R	S	T
×10	×10	×10	×10	×6	×6	×6	×7	×5

2 points

C	D	L	P
×4	×5	×5	×4

3 points

B	N
×3	×4

4 points

F	G	H	V
×2	×3	×2	×4

7 points

Ã	J
×2	×1

8 points

Ç	K	W	X
×2	×1	×1	×1

9 points

Y
×1

10 points

Q	Z
×1	×1

0 points

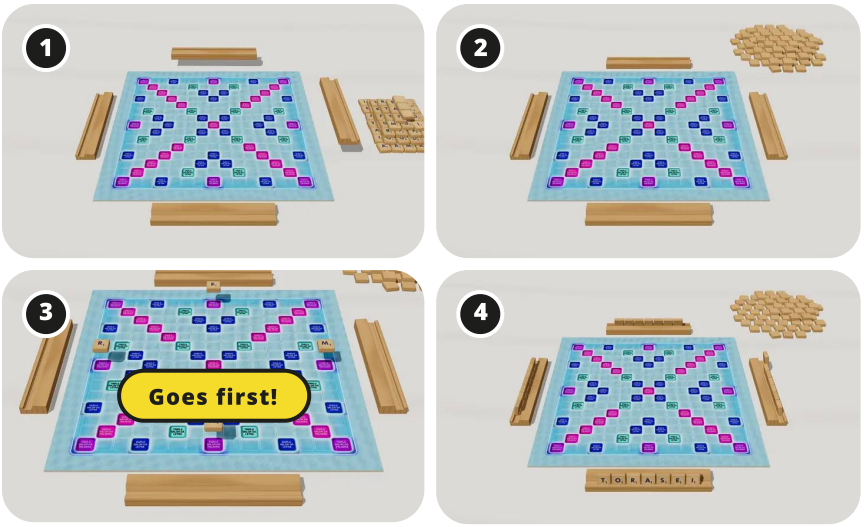

×3 · wildcard

Total: 117 letters + 3 wildcards = 120 tiles.

HOW TO PLAY

Rules step by step

1 RULE 1 OF 10
Setup

1. Open the board in the middle of the table and give **each player a rack**.
2. Spread the tiles on the table with the **letters facing down**.
3. Everyone draws one tile. **Whoever gets the letter closest to A goes first.**
4. Put those tiles back, mix everything and each player takes **7 tiles** for their rack.

RULE 2 OF 10

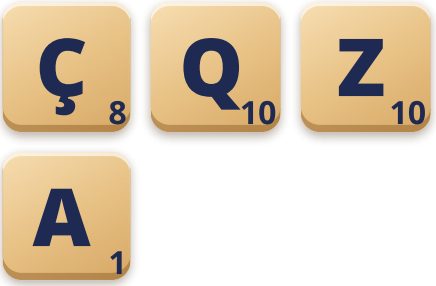

2 Letter points

A The letter

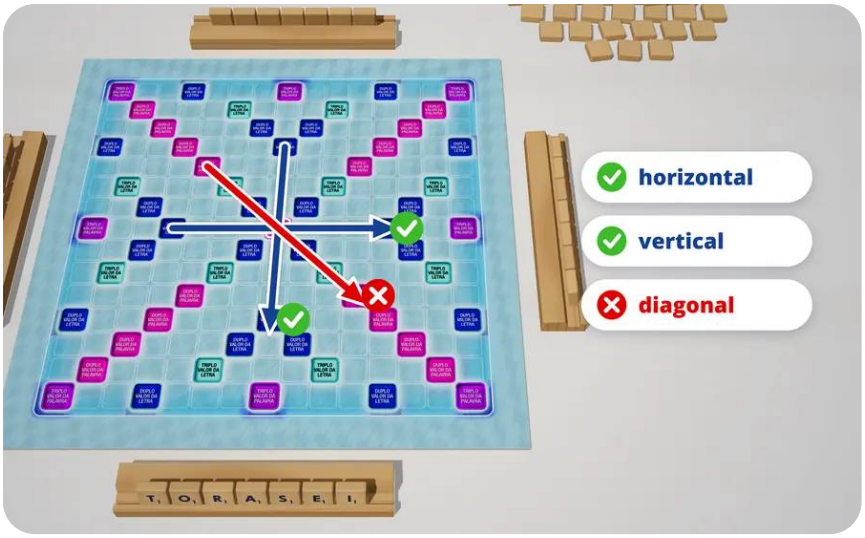

B The letter's points (the small number)

The small number on each tile is the **letter's points**. **Vowels are worth 1.** Harder letters are worth more: **Ç is worth 8**, **Q** and **Z are worth 10**.

RULE 3 OF 10

3 The first move

A Center square, pink: doubles the value of the first word

The first word of the game needs:

- At least **2 letters**
- To cover the **center square**
- To go **across** or **down**
- **Diagonal** doesn't count

EXAMPLE: TORAS

T O R A S

1 + 1 + 1 + 1 + 1 = 5 × 2

10 points

AFTER PLAYING

Write down your points and draw new tiles so you always have 7. **Once a tile is placed, it can't be moved.** Then it's the turn of the player on the **left**.

RULE 4 OF 10

4 Making words

1 Extend

Add letters to a word.

2 Cross

Use a letter from a word that's already there.

3 Alongside

Next to another word, as long as all the touching letters form words.

From now on, **every new word must connect** to the words already on the board. There are three ways:

A new tiles

VARAL crosses TORAS

3rd move · PASSAR

2ND MOVE · VARAL CROSSES TORAS

It uses the R from TORAS. The center square was already used, so it **doesn't double anymore**.

VARAL

4 + 1 + 1 + 1 + 2 = 9

9 points

3RD MOVE · PASSAR

The **A** and the **R** landed on **light-blue** squares: those letters are worth triple.

PASSAR

2 + 3 + 1 + 1 + 1 + 3 = 11

11 points

RULE 5 OF 10

5 Several words at once

4th move · Two tiles, three words

5th move · MAR alongside

One move can make more than one word. **Add them all.** A letter on a letter-bonus square counts with the bonus in every word it is part of.

4TH MOVE · TWO TILES, THREE WORDS

With just an **M** and an **A**, you get AMA (across), AMA (down) and LAR. The M is on a **dark-blue** square and counts double **in both words** it's part of.

A1 M1 A1 1 + 2 + 1 = 4
A1 M1 A1 1 + 2 + 1 = 4
L2 A1 R1 2 + 1 + 1 = 4

12 points

5TH MOVE · MAR ALONGSIDE

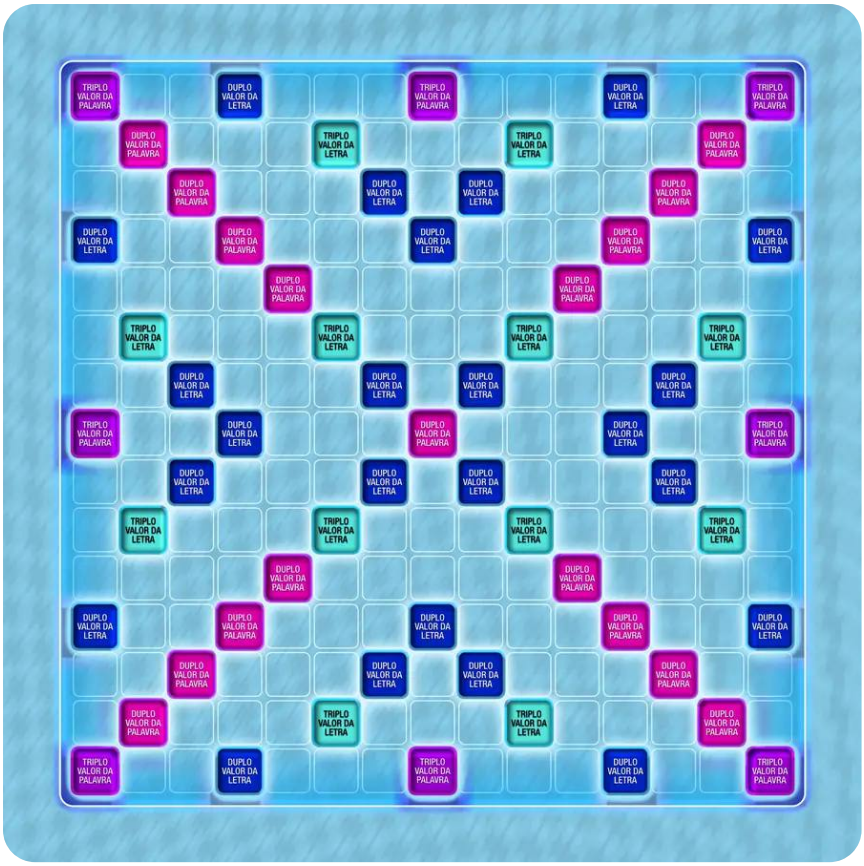

Under PASSAR, MAR also makes PÁ and AR, going down. The A landed on a **pink** square, which doubles MAR and PÁ.

M1 A1 R1 (1 + 1 + 1) × 2 = 6
P2 A1 (2 + 1) × 2 = 6
A1 R1 1 + 1 = 2

14 points

RULE 6 OF 10

6 Colored squares

The colored squares give bonuses. Each one has its name printed on the board (in Portuguese):

DUPLO VALOR DA LETRA · DOUBLE LETTER × 2
Dark blue: double letter

TRIPLO VALOR DA LETRA · TRIPLE LETTER × 3
Light blue: triple letter

DUPLO VALOR DA PALAVRA · DOUBLE WORD × 2
Pink: double word. The center square is pink too.

TRIPLO VALOR DA PALAVRA · TRIPLE WORD × 3
Purple: triple word

A SPECIAL RULE IN THIS GAME

When a word gets a **word bonus** (pink or purple), add up the letters' **normal** values and multiply. Letter bonuses don't count in that word.

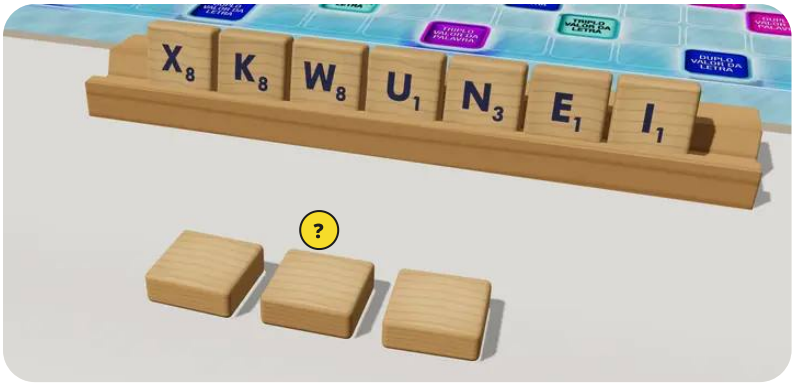

2 + 1 + 1 + 1 = 5 × 2 **= 10**

In CASA, the C is on a dark-blue square and the last A on a pink one: count 2 + 1 + 1 + 1 = 5, times 2. **10 points**, without doubling the C.

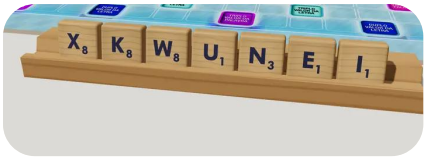

Each bonus only counts for whoever covers the square first. After that, it's an ordinary square.

RULE 7 OF 10

7 Wildcards, swaps and bonus

? Blank tile: stands for any letter and is worth 0

Swap · before

Swap · after

WILDCARD

The **3 blank tiles** can stand for any letter, but they're **worth 0 points**. Whoever plays one says which letter it stands for, and it stays on the board until the end.

If a wildcard lands on a pink or purple square, the word bonus still counts.

SWAP

Don't like your tiles? On your turn, return **some or all** of them face down and draw the same number. But **you lose that turn**.

50-POINT BONUS

Used **all 7 tiles at once**? Get **50 extra points** on top of the move's points.

RULE 8 OF 10

8 Words that count

Allowed

- Words in the dictionary
- Words with accents. **Accents don't need a tile.**

= MARÉ

= PÉ

= PÁ

- **Ç** and **Ã** have their own tiles.

= MAÇÃ

Not allowed

- Proper names
- Foreign (non-Portuguese) words
- Abbreviations
- Words with a hyphen or apostrophe

The dictionary is only for checking. A word can only be challenged **while it's still that player's turn**.

RULE 9 OF 10

9 End of the game

The game ends when:

- someone uses all their tiles and **there are none left to draw**; or
- **nobody can** make any more words.

FINAL SCORING

Each player **subtracts** the points of the tiles left on their rack.

Whoever has **no tiles left adds** the points left over in the opponents' racks.

WHO WINS
The highest score wins!

EXAMPLE OF A FINAL SCOREBOARD

Player 1 — Winner! — **36**
24 + 12 = 36
no tiles left: adds 4 + 2 + 6

Player 2 — **5**
9 − 4 = 5
left O(1) E(1) C(2)

Player 3 — **9**
11 − 2 = 9
left I(1) O(1)

Player 4 — **6**
12 − 6 = 6
left E(1) D(2) U(1) T(1) S(1)

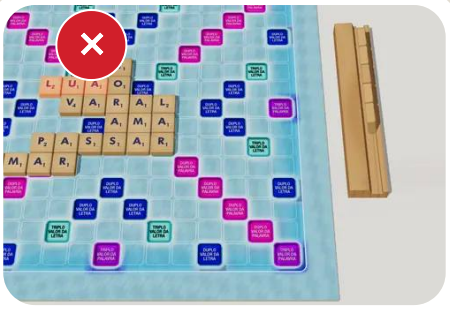

RULE 10 OF 10

10 What's not allowed

A word on its own

Every new word must connect to what's already on the board.

Touching without making words

Everything your tile forms, across and down, must be a word. Here, LUA placed against other tiles formed LUAO, UV and AA.

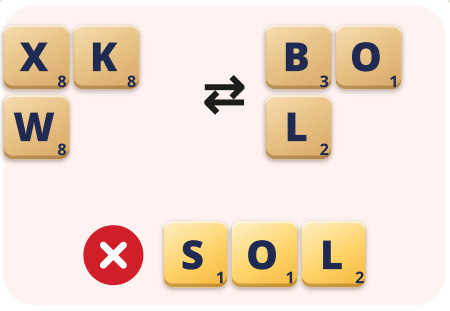

Diagonal or scattered tiles

All the tiles in one move go in the same line: across or down.

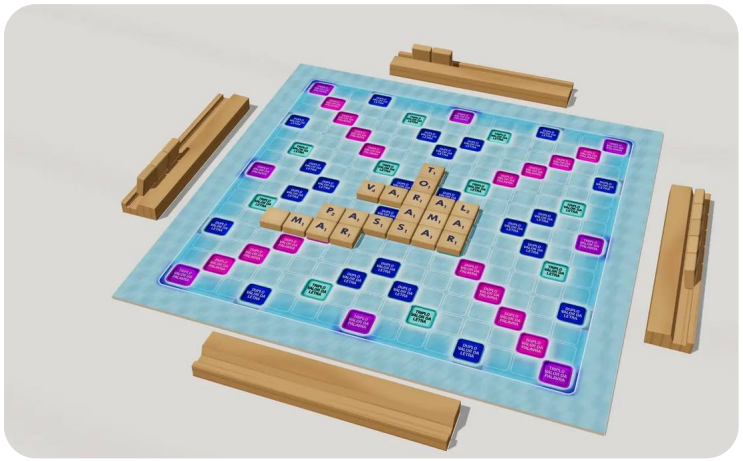

Moving a played tile

A played tile can't be moved. A wildcard can't be taken back either.

Swapping and playing on the same turn

If you swap tiles, your turn is over.

Ready to play!

Call the family and have a great game! **The highest score wins.**

Ages 7 and up. Put the tiles back in the box after playing so none get lost.
